

ASM/OSHA SAFETY ROUNDTABLE

A Review of Company Safety Programs

Tuesday, February 24, 2009

OVERVIEW

Having a safety program is essential not only to improve safety performance within your company, but also to be able demonstrate your commitment to safety, if questioned by OSHA or your insurers.

This program will provide a comprehensive review of safety programs at several companies, highlighting the key elements. We will study the documentation that should be included in a safety program, and learn how safety programs can be strengthened. There will also be an open forum for participants to ask questions or comment on their own safety programs.

ATTENTION COMPANY OWNERS!

Please pass this along to your safety officers, PMs or anyone responsible for safety on the job site... and encourage them to attend! These sessions always provide great information – more so than people expect! Also attending will be insurance experts, and officials from the Massachusetts Division of Occupational Safety. Following the formal presentation there will be an open discussion on issues of particular interest and concern to you. Please fill out the registration form below and FAX it to us no later than Thursday, February 20th.
